

A Analytic workflow

B Evidence hierarchy

Source	Unit	Role
Genetic anchor	LD locus	Direction
MSSM	Donor	Disease state
RADC	Donor	Pathology
SEA-AD	Donor x region	Regional context

C Interpretation boundary

$$S = 2 P(\text{aligned signs}) - 1$$

- $S > 0$ probabilistic sign alignment
- $S < 0$ probabilistic sign opposition
- $S \approx 0$ directional uncertainty

Not evidence of protection, compensation, causality, equivalence, or independent genetic replication.
